# EXPERIENCE

## FRONT-END DEVELOPER - FITEC

2023 - currently working here

Front-End Developer at Acer Team, contributing to various projects focused on service management, marketplaces, and price analysis.

- PTT (Product Price Tracking): A tool for analyzing Acer product prices across different marketplaces. I worked on front-end development and the integration of filters and pagination. (São Paulo Team).
- Marketplace: A system for registering and managing Acer products, such as laptops and monitors. I contributed to UI implementation, business logic, and API consumption. (Recife Team).
- B2B (Business to Business): A platform for selling Acer products to partners, featuring various tools for optimizing the sales process. I participated in the system's development and maintenance. (Manaus Team).
- Gestão de Serviços: An internal system to facilitate data management for Acer employees, with two modules: Service Management and Service Price Management. I developed the entire interface and API integration, including filters and pagination.

Tech Stack: React, TypeScript, Ant Design, Zustand, Vite, Vitest.
